

AFRICA & ASIA

WHY DID THEIR ECONOMIC PATHS DIVERGE?

A cultural analysis of history, institutions and growth

STRUCTURE DRAFT • v0.1

All data and final images still need research, citation and replacement.

Was slower growth caused by culture...

or was culture itself shaped by
history and institutions?

HISTORICAL IMAGE COLLAGE / TEXTURE

BUILD NOTE

PAGE ACTION

Use this question as a recurring visual device on section openers and in the presentation.

INFOGRAPHIC / INTERACTION TIP

Recurring pull-quote motif: repeat the central question at each section break.

CONTENTS

A visual route through the argument

BUILD NOTE **PAGE ACTION** Add team names, roles and a clickable contents page in the digital version.

INFOGRAPHIC / INTERACTION TIP Use colored section tabs and small icons so readers can navigate quickly.

1960: TWO REGIONS AT A CROSSROADS

A dramatic opener using one image per region

Many countries were poor and largely agricultural.

Over the next six decades, their economic paths often diverged. This magazine investigates why - without treating either region as one culture.

BUILD NOTE

PAGE ACTION

Pair this with page 5. Use archival photos with equal dignity and avoid visual stereotypes.

INFOGRAPHIC / INTERACTION TIP

Split-screen archival photos with one shared timeline running across both pages.

AFRICA AND ASIA IN 1960

A dashboard of comparable starting conditions

AFRICA CASE - PLACEHOLDER

ASIA CASE - PLACEHOLDER

WHAT TO COMPARE

Income per person, life expectancy, literacy, urbanisation and export structure.

WHY IT MATTERS

Readers need a fair baseline before seeing later outcomes.

DATA TODO: World Bank historical indicators; Maddison Project; UNESCO. Values above are placeholders.

BUILD NOTE

PAGE ACTION

Use the same scales and years. Do not cherry-pick regional averages.

INFOGRAPHIC / INTERACTION TIP

Mirrored dashboard: identical icons, scales and years for both regions.

THE SAME INDICATORS TODAY

Reveal the divergence with a single clean visual

THE REVEAL

Growth was uneven in both regions.

Replace the simple lines with sourced regional and country-level data.

SOURCE PLAN: World Development Indicators; AfDB; ADB. Graph is deliberately illustrative.

BUILD NOTE

PAGE ACTION

Animate the two lines during the oral presentation, then immediately show country exceptions.

INFOGRAPHIC / INTERACTION TIP

Animated line reveal for presentation; small-multiple charts in print.

WHAT ACTUALLY DIVERGED?

Break 'development' into mechanisms, not one GDP number

1

PRODUCTIVITY

Output per worker

2

STRUCTURE

Agriculture → industry

3

EXPORTS

Raw goods → manufactured goods

4

CAPABILITY

Skills, technology and firms

CENTRAL CLAIM TO TEST

The key difference was not only growth speed.

It was how economies moved workers and capital into more productive activities.

BUILD NOTE**PAGE ACTION**

This page supplies the economic backbone. Culture is introduced later as one influence on these mechanisms.

INFOGRAPHIC / INTERACTION TIP

Use a Sankey-style flow: workers move from agriculture into industry or services.

NEITHER REGION IS ONE STORY

Make the warning visual, brief and impossible to miss

54 African states. Vastly different histories, institutions and economies.

Asia contains both global growth leaders and economies that developed more slowly.

BUILD NOTE**PAGE ACTION**

Use maps and short country labels. This protects the report from continental stereotypes.

INFOGRAPHIC / INTERACTION TIP

Map mosaic: several countries inside each continent shape to show diversity.

HOW WE BUILD OUR OWN THEORY

A theory must explain, predict and risk being wrong

OUR RULE

Existing theories are ingredients.

Our contribution is the new connection between them - and a prediction that cases can challenge.

Bad theory: 'Culture made Africa grow slowly.'

BUILD NOTE

PAGE ACTION

Every group theory should have: mechanism, prediction, evidence, counterexample and limitation.

INFOGRAPHIC / INTERACTION TIP

Circular diagram: Observe → Connect → Predict → Test → Revise.

THREE IDEAS - NOT THREE ANSWERS

The reader meets each theory first as a question

01

CONNECTED DEVELOPMENT

What if the decisive difference was not the amount of infrastructure, but whom it connected?

Colonial export corridors moved resources out. Development may require networks that connect firms, workers and domestic markets.

02

THE RADIUS OF TRUST

How far beyond family and close networks can economic trust travel?

Our theory: larger firms and formal markets grow more easily when trust extends into contracts, banks, courts and professional managers.

03

CONTINUITY + ADAPTATION

Can a country learn industrially if its direction changes every few years?

Our theory: development needs long-term policy continuity, but also the ability to correct policies that fail.

VOTE NOW - THEN VOTE AGAIN AT THE END

BUILD NOTE

PAGE ACTION

Repeat these questions as small sidebars on the railway, trust, country-case and conclusion pages.

INFOGRAPHIC / INTERACTION TIP

Three large question cards with a class vote and a before/after result bar.

COLONIALISM CHANGED THE STARTING LINE

Extraction, administration and state-building left different inheritances

HISTORY IS NOT A FOOTNOTE.

It shaped borders, infrastructure, authority and trade patterns.

WHO COLONISED WHOM?

A color-coded map with a timeline of independence

**BUILD NOTE****PAGE ACTION**

Replace circles with an accurate historical map. Include a clear note that borders and control changed over time.

INFOGRAPHIC / INTERACTION TIP

Historical map plus independence timeline; never rely on color without labels.

BRITISH RULE: GOVERN THROUGH LOCAL AUTHORITIES

Present as tendencies, not universal rules

HOW IT WORKED

Indirect rule often used existing or newly empowered local authorities.

QUESTION FOR TODAY

Possible legacy: strong local intermediaries and uneven state reach.

CULTURAL LINK - FRAME AS A HYPOTHESIS

How might repeated experience of local or distant authority shape trust, identity and power distance?

SOURCE PLAN: comparative colonial administration research; country histories; avoid blanket claims.

BUILD NOTE **PAGE ACTION** Add one country example that supports the model and one that complicates it.

INFOGRAPHIC / INTERACTION TIP Four-box authority chain with arrows; add one real country example below it.

FRENCH RULE: BUILD A CENTRALISED STATE

Present as tendencies, not universal rules

HOW IT WORKED

French rule generally stressed central administration, language and assimilation.

QUESTION FOR TODAY

Possible legacy: centralised bureaucracy and authority flowing from the capital.

CULTURAL LINK - FRAME AS A HYPOTHESIS

How might repeated experience of local or distant authority shape trust, identity and power distance?

SOURCE PLAN: comparative colonial administration research; country histories; avoid blanket claims.

BUILD NOTE **PAGE ACTION** Add one country example that supports the model and one that complicates it.

INFOGRAPHIC / INTERACTION TIP Mirror page 13 exactly so readers can compare British and French systems.

THE EMPIRES THAT DO NOT FIT THE BINARY

Belgian, Portuguese, German and Italian cases

BE

BELGIAN CONGO

Extreme extraction and thin local administration

PT

PORTUGUESE AFRICA

Late decolonisation and forced labour systems

DE

GERMAN COLONIES

Shorter rule, major violence in some territories

IT

ITALIAN RULE

Settler ambitions and uneven institutional legacies

FOUR-IMAGE ARCHIVE STRIP

**BUILD NOTE****PAGE ACTION**

Each box needs one verified example and one academic source. Keep claims short.

INFOGRAPHIC / INTERACTION TIP

Four archive-photo cards, one striking fact and one caution per colonial power.

THE RAILWAY PROBLEM

Were networks built to connect people - or extract goods?

Solid line: inherited export corridor

Dotted line: missing domestic network

BUILD NOTE**PAGE ACTION**

Replace the fictional map with two real railway examples and explain what changed after independence.

INFOGRAPHIC / INTERACTION TIP

Before/after network map: mine-to-port corridor versus connected domestic cities.

LINES DRAWN FROM OUTSIDE

Use one striking map to show partition and forced combination

One group divided. Different groups placed inside one new state.

SOURCE PLAN: partitioned ethnic groups research + one accurate country example.

BUILD NOTE **PAGE ACTION** Do not suggest all borders were arbitrary in the same way. Use precise examples.

INFOGRAPHIC / INTERACTION TIP Layer ethnic territories and state borders with transparent colors.

YOU ARE DESIGNING A COUNTRY

There is no clean line - every border creates trade-offs

QR PLACEHOLDER

DRAW YOUR BORDER

Then reveal the effects on identity, trade and political competition.

BUILD NOTE

PAGE ACTION

Genially version: drag a border line, then receive three consequences based on the chosen route.

INFOGRAPHIC / INTERACTION TIP

Interactive drag-a-border game; reveal effects on trade, identity and conflict.

INDEPENDENCE: WHAT WAS INHERITED?

A visual inventory, not a paragraph

1

EXPORT RAILWAY

Mine → port

2

COMMODITY RISK

One crop or mineral

3

THIN INDUSTRY

Few local factories

4

BORDERS

Competing identities

5

BUREAUCRACY

Built to govern

6

SKILL GAPS

Limited mass education

BUILD NOTE**PAGE ACTION**

This page becomes the starting screen for the president game on page 20.

INFOGRAPHIC / INTERACTION TIP

Suitcase infographic: show what a new state 'inherits' at independence.

YOU ARE PRESIDENT IN 1960

Spend 100 points. Every choice has an opportunity cost.

A

SCHOOLS

Long-term skills; slow payoff

B

Factories

Jobs; costly and risky

C

ROADS

Connect the domestic market

D

HEALTH

Lives and productivity

E

MILITARY

Security; less development cash

F

GOVERNMENT

Build state capacity

YOUR BUDGET

\$ 100

QR PLACEHOLDER

BUILD NOTE

PAGE ACTION

No perfect answer. Final screen should show growth, inequality, trust, stability and debt.

INFOGRAPHIC / INTERACTION TIP

100-point budget game with tokens readers physically or digitally allocate.

WHY DID PARTS OF ASIA INDUSTRIALISE FASTER?

Factories, exports, learning and coordinated state action

THE DEVELOPMENTAL-STATE STORY

THE EAST ASIAN GROWTH ENGINE

Show the reinforcing loop

DO NOT PRESENT THIS AS A SINGLE ASIAN FORMULA

Japan, Korea, Taiwan, Singapore, China and Vietnam used different mixes of markets, state direction and global trade.

BUILD NOTE **PAGE ACTION** Add a small timeline showing when each economy entered export manufacturing.

INFOGRAPHIC / INTERACTION TIP Reinforcing loop diagram: skills → firms → exports → learning → upgrading.

MANUFACTURED EXPORTS VS RAW COMMODITIES

Compare where value is created and who learns

MANUFACTURING SHARE - PLACEHOLDER

COMMODITY RELIANCE - PLACEHOLDER

VALUE-CHAIN QUESTION

Who captures design, processing, logistics and brand value?

DATA TODO: UNCTAD / World Bank export composition. All bar heights are placeholders.

BUILD NOTE **PAGE ACTION** Use the same product as a visual thread: raw cotton → fabric → clothing brand.

INFOGRAPHIC / INTERACTION TIP One product journey: raw cotton → fabric → garment → branded product.

SOUTH KOREA

From agrarian economy to industrial exporter

1953

War recovery

1960s

Export push

1980s

Upgrade

Today

High-tech

CASE SOURCES: national history + World Bank data + peer-reviewed development research.

BUILD NOTE

PAGE ACTION

Write this as a 4-step story: starting position, policy choice, constraint, result.

INFOGRAPHIC / INTERACTION TIP

Four-frame timeline with one number, one policy and one image per era.

GHANA

Commodity wealth, political change and a different industrial path

1957

Independence

1960s

State projects

1980s

Reforms

Today

New sectors

CASE SOURCES: national history + World Bank data + peer-reviewed development research.

BUILD NOTE

PAGE ACTION

Write this as a 4-step story: starting position, policy choice, constraint, result.

INFOGRAPHIC / INTERACTION TIP

Use the same four-frame structure as Korea to make comparison fair.

SOUTH KOREA VS GHANA

Similar-era comparison, very different paths - but not a laboratory experiment

KOREA

GHANA

STARTING POINT

Low income

Low income

EXPORT BASE

Primary goods

Cocoa / primary goods

STATE STRATEGY

Export industry

Mixed / shifting

GEOPOLITICS

High Cold War support

Different external setting

OUTCOME

Industrial upgrading

Slower structural change

BUILD NOTE

PAGE ACTION

Add precise figures and explain why the comparison is useful but imperfect.

INFOGRAPHIC / INTERACTION TIP

Comparison table plus two 'what this comparison cannot prove' warning tags.

HOFSTEDE'S SIX DIMENSIONS

A comparison lens - not a verdict on a country or a direct cause of growth

Use country scores carefully: they describe average survey patterns, not every individual.

TRUST: PERSONAL OR INSTITUTIONAL?

What makes people willing to transact with strangers?

Trust affects contracts, firm size, tax compliance, delegation and investment.

BUILD NOTE **PAGE ACTION** Connect historical shocks to trust carefully. Correlation and long-run mechanisms need proper sourcing.

INFOGRAPHIC / INTERACTION TIP Network diagram: trust links expand from family to firms, banks and courts.

WHO WOULD YOU TRUST WITH THE MONEY?

Vote first. Reveal the cultural lens after.

A

FAMILY MEMBER

Known and loyal

B

CLOSE FRIEND

Personal relationship

C

PRO MANAGER

Qualified stranger

D

BANK

Formal institution

E

GOVERNMENT

Public guarantee

HIDDEN QUESTION

When do relationships substitute for institutions?

QR PLACEHOLDER

BUILD NOTE**PAGE ACTION**

Use anonymous class results and avoid assigning national stereotypes to individual answers.

INFOGRAPHIC / INTERACTION TIP

Anonymous live poll; reveal the concept only after everyone answers.

INDIVIDUALISM VS COLLECTIVISM

Family networks can support survival and enterprise

POSSIBLE STRENGTH

**Strong support,
loyalty and informal
finance**

POSSIBLE COST

**Obligations may
limit delegation or
merit-based hiring**

The effect depends on institutions, incentives and context.

BUILD NOTE

PAGE ACTION

Add one economic example on each side. Avoid labelling either cultural orientation as good or bad.

INFOGRAPHIC / INTERACTION TIP

Two-sided balance graphic: possible strength on one side, possible cost on the other.

POWER DISTANCE

How easily can authority be questioned?

POSSIBLE STRENGTH

**Fast coordination
and respect for
leadership**

POSSIBLE COST

**Weak challenge can
protect bad
decisions**

The effect depends on institutions, incentives and context.

BUILD NOTE

PAGE ACTION

Add one economic example on each side. Avoid labelling either cultural orientation as good or bad.

INFOGRAPHIC / INTERACTION TIP

Use a manager-employee comic showing challenge versus silence.

LONG-TERM ORIENTATION

Saving, education and delayed rewards

POSSIBLE STRENGTH

**Investment in skills
and future
capability**

POSSIBLE COST

**Present needs can
make delay costly
or impossible**

The effect depends on institutions, incentives and context.

BUILD NOTE

PAGE ACTION

Add one economic example on each side. Avoid labelling either cultural orientation as good or bad.

INFOGRAPHIC / INTERACTION TIP

Timeline choice: consume today, invest for five years, or invest for twenty.

THE OTHER THREE HOFSTEDE DIMENSIONS

Include all six, but spend space in proportion to their relevance

04

UNCERTAINTY AVOIDANCE

Comfort with ambiguity, risk and unfamiliar rules.

Possible link: entrepreneurship, regulation and reactions to rapid reform.

05

MASCULINITY / FEMININITY

Competition and achievement versus care and quality of life.

Possible link: work incentives, status and social-policy choices.

06

INDULGENCE / RESTRAINT

How freely people expect to satisfy wants and enjoy life.

Possible link: consumption, saving and social control - likely indirect.

CAUTION

Do not force a growth claim where the evidence is weak.

BUILD NOTE

PAGE ACTION

Use Hofstede's own definitions, add critique, and compare selected countries rather than continents.

INFOGRAPHIC / INTERACTION TIP

Three compact cards; show weaker relevance with lighter visual weight.

CAN OUR THREE IDEAS SURVIVE THE EVIDENCE?

A theory becomes useful only when we state what could challenge it

CONNECTED DEVELOPMENT

Prediction: countries with stronger internal and regional networks diversify faster.

Challenge: a disconnected country industrialises rapidly.

RADIUS OF TRUST

Prediction: broader institutional trust supports larger formal firms and delegation.

Challenge: low-trust settings repeatedly scale firms without substitutes.

CONTINUITY + ADAPTATION

Prediction: sustained industrial direction supports learning and upgrading.

Challenge: frequent policy reversal has no effect on capability building.

QUESTION FOR THE READER

Which case would make you abandon or revise one of these theories?

BUILD NOTE

PAGE ACTION

Separate what the evidence shows from the group's interpretation and from what remains uncertain.

INFOGRAPHIC / INTERACTION TIP

Theory test matrix: prediction, supporting case, challenge and revised theory.

OUR CLASS HAS A CULTURE TOO

Five questions, anonymous answers, careful interpretation

01 Hire family or the best-qualified stranger?

02 Challenge a manager who is wrong?

03 Trust a signed contract with a stranger?

04 Save now for a payoff in ten years?

05 Should one rule apply equally to everyone?

QR PLACEHOLDER

RESULTS PAGE

Replace bars with your own class data.

BUILD NOTE

PAGE ACTION

State the sample size and limitations. This is a discussion prompt, not proof about whole societies.

INFOGRAPHIC / INTERACTION TIP

Horizontal class-result bars with sample size and a limitations box.

BOTSWANA

A challenge to simple culture-first explanations

WHY THIS CASE MATTERS

If one simple cultural explanation cannot explain this case, the theory needs revision.

BUILD NOTE

PAGE ACTION

Choose indicators that match the claim: governance, diversification, education, exports or productivity.

INFOGRAPHIC / INTERACTION TIP

Counterexample stamp: 'Our first explanation fails here - why?'.

SECOND AFRICAN CASE

Choose Mauritius, Morocco, Kenya, Rwanda or another defensible case

WHY THIS CASE MATTERS

If one simple cultural explanation cannot explain this case, the theory needs revision.

BUILD NOTE

PAGE ACTION

Choose indicators that match the claim: governance, diversification, education, exports or productivity.

INFOGRAPHIC / INTERACTION TIP

Use a different African pathway, not merely another success ranking.

ASIA IS NOT ONE SUCCESS STORY EITHER

Compare fast growth, middle paths and persistent poverty

A

FAST CASE

Industrial upgrading

B

MIDDLE CASE

Growth with constraints

C

SLOW CASE

Conflict / weak capacity

COUNTRY SELECTION TODO: choose defensible cases and use consistent indicators.

BUILD NOTE**PAGE ACTION**

This page prevents the report from becoming 'Asia good, Africa bad'.

INFOGRAPHIC / INTERACTION TIP

Three country trajectories on identical axes to show variation within Asia.

MYTH OR FACT?

Tap or scan to flip each card

CULTURE EXPLAINS EVERYTHING

MYTH

COLONIALISM EXPLAINS EVERYTHING

MYTH

RESOURCES GUARANTEE WEALTH

MYTH

INSTITUTIONS CAN CHANGE NORMS

FACT

ASIA USED ONE MODEL

MYTH

CONTEXT CHANGES POLICY RESULTS

FACT

QR PLACEHOLDER

BUILD NOTE

PAGE ACTION

Each reveal should include one sentence of explanation and one source link.

INFOGRAPHIC / INTERACTION TIP

Clickable flip cards; every answer needs one sentence and one source.

WHAT IF DEVELOPMENT NEEDS ALL THREE?

The group's combined theory - presented as a model to debate

OUR PROPOSED THEORY

Countries upgrade faster when people and firms are connected, trust can scale beyond close networks, and policy remains stable long enough to learn - while still correcting failure.

BUILD NOTE

PAGE ACTION

Present this as the group's best current explanation, then immediately state its limitations and exceptions.

INFOGRAPHIC / INTERACTION TIP

Layered pyramid with the group's three theories crossing several layers.

WHAT COULD AFRICAN COUNTRIES LEARN FROM ASIA?

Focus on capabilities, not copying national cultures

1

EXPORT CAPABILITY

Help firms meet global standards

2

TECHNICAL SKILLS

Link education to industry

3

RELIABLE POWER

Reduce the cost of production

4

STATE DELIVERY

Implement policy consistently

5

REGIONAL MARKETS

Create scale across borders

6

FIRM LEARNING

Upgrade from simple to complex

BUILD NOTE**PAGE ACTION**

Each lesson needs an African example already applying it. Avoid a one-way 'Asia teaches Africa' tone.

INFOGRAPHIC / INTERACTION TIP

Capability ladder: basic production → quality → design → technology → brand.

WHAT CANNOT SIMPLY BE COPIED?

Policies travel; starting conditions do not

HISTORICAL CONDITIONS

- Cold War geopolitics
- Population density
- Land and transport geography
- Colonial borders

INSTITUTIONAL CONDITIONS

- Political systems
- Resource endowments
- Regional market size
- Historical state capacity

ADAPT THE MECHANISM. DO NOT COPY THE SURFACE.

BUILD NOTE **PAGE ACTION** End with two short examples of adaptation rather than imitation.

INFOGRAPHIC / INTERACTION TIP Adapt-versus-copy split screen with a real example on each side.

FIVE THINGS THE READER SHOULD REMEMBER

Short statements designed for the oral presentation

1

Development paths diverged through structural change, not one cultural trait.

2

Colonial systems shaped what states inherited at independence.

3

East Asian growth relied on learning, exports, firms and capable states.

4

Trust, authority and networks matter through the institutions around them.

5

Both culture and institutions can change.

BUILD NOTE

PAGE ACTION

Turn these five statements into the final five spoken sentences of the presentation.

INFOGRAPHIC / INTERACTION TIP

Five numbered takeaways that double as the presenter's final speaking notes.

SOURCE PLAN / WORKING BIBLIOGRAPHY

Replace with the exact editions, URLs, page numbers and access dates used

- 01 World Bank. World Development Indicators and reports on structural transformation.
- 02 African Development Bank. African Economic Outlook, recent edition.
- 03 Nunn, N. Research on the long-term effects of Africa's slave trades and colonialism.
- 04 Nunn, N. & Wantchekon, L. Research on historical shocks and trust.
- 05 Michalopoulos, S. & Papaioannou, E. Research on partitioned ethnic groups and pre-colonial institutions.
- 06 Acemoglu, D., Johnson, S. & Robinson, J. Research on colonial institutions and development.
- 07 UNCTAD. Trade and export composition data.
- 08 Maddison Project Database. Long-run income estimates.
- 09 Country histories for Ghana, South Korea, Botswana and selected second African case.
- 10 Hofstede / Trompenaars / Hall only where their concepts fit, with critique of national averages.

BUILD NOTE **PAGE ACTION** Use footnotes or numbered endnotes on every research page. Images also need credits.

INFOGRAPHIC / INTERACTION TIP Numbered endnotes plus image credits; use QR links only as a supplement.

FINAL QUESTION

IF CULTURE MATTERS, CAN CULTURE CHANGE?

QR PLACEHOLDER

Scan for the interactive magazine

Final link added after the Genially build.
